Victor Espinoza

Lead Software Engineer / Full-Stack, AI Agents & Messaging Platforms / Odoo ERP

Builds the systems a business runs on, and has run the business.

12 years in software, systems and operations | **1,040** regression tests gating every deploy | **~22** Odoo 19 instances in production | **40+** custom Odoo modules built

SUMMARY

Full-stack engineer who takes business systems from brief to production and then operates them. Currently lead engineer for a US-facing online gaming operator: a multi-tenant messaging platform, AI voice and chat agents, a payment hub and call-center integrations. Earlier: head of technology at an impact incubator, CTO of a wellness startup. Also an operator (general manager, hotel co-founder), so the software is scoped by revenue, operations and compliance. Works AI-first as architect and reviewer: Claude Code agents build, multi-agent panels review, and the regression suite decides what ships. Available full-time.

SELECTED RESULTS

- **Multi-tenant messaging platform.** Took over a 71-test prototype and in five weeks made it the operator's live platform: an audience of **~10.6k players** and **8 instances** from one code base, with zero-downtime restarts.
- **AI voice agents, decided by measurement.** Outbound AI phone hosts for two brands made **1,295 calls** in week one and **20%** reached a person. Model chosen on measured latency (0.8 s vs 1.2 s), script on a 1,000-call A/B test.
- **Fleet reliability.** Found scheduled jobs silently dead on **17 of 21** Odoo instances for up to 82 days, traced the cause into Odoo's server code and fixed it across the fleet.
- **Incident response.** Contained a crypto-miner and rootkit in a client's database container in about **2 minutes**, removed it in 8 with no data loss, then closed the way in.
- **Delivery speed.** AI-assisted development cut custom module delivery from about **40 hours to 5**. A portal helpdesk went from brief to production in two days, with 49 tests.
- **Operator.** Co-founded a 10-room boutique hotel on a **$150k** investment and sold it for **$210k** in 24 months. As general manager of a retreat center, raised occupancy from **35% to 75%** in two years.

TypeScript / JavaScript | Node.js | Python | React / Next.js | React Native | Odoo 13–19 | PostgreSQL | CI/CD | LLM agents & RAG | Voice AI

2022 – 2024	**Co-Founder & General Manager** · Hotel Alma de Luna · 10 rooms · sold 2024	

EXPERIENCE

ENGINEERING AND TECHNOLOGY LEADERSHIP

Lead Software Engineer & Marketing Manager

Mar 2024 – Present

US-facing online gaming operator · Remote · independent contractor

Casino and sportsbook brands. Started in marketing operations and back-office features; main engineer on the in-house platform since August 2026, leading two developers and overseeing sales and customer-service agents. Also runs the outbound campaigns (one night: 1,118 dialed, 839 answered) with Python-built client reports.

8 tenant instances / **~10.6k** player audience / **1,040** tests gate each deploy / **2** brands with AI voice hosts

Player marketing platform — Lion Reach and Digital Reach

Node.js 22, Express, SQLite, systemd, Caddy

- Took over a 71-test prototype in August 2026 and in five weeks made it the operator's live multi-channel platform for **~10.6k players**: SMS and voice campaigns, a journey engine, a two-way inbox, AI personas and click-to-call, with zero-downtime restarts. One code tree serves **8 white-label instances**, each with its own domain, branding and phone lines.
- Put compliance in the send path (hash-chained consent ledger, TCPA quiet hours by recipient time zone, STOP handling) and closed **16 access-control holes** and a cross-tenant leak. Defined the test strategy and release gate: **1,040 unit and integration tests** run before every deploy, smoke tests after; a load test at 20,000 inbox threads exposed a truncation bug before users did.

AI voice and chat agents

Retell AI, SIP, Telnyx, LiveKit, Python, xAI Grok

- Launched outbound AI phone hosts for two brands (SIP bridge, custom tools, signed webhooks, live transfer to a human): **1,295 calls** in the first week, **20%** reached a person. Model chosen on measured latency (0.8 s vs 1.2 s), script on a **1,000-call A/B test**; a self-hosted LiveKit alternative benchmarked and parked. Chat Persona: a live-chat widget and LLM agent on two sites.

Telephony, email and call center

PHP, Kotlin, Cloudflare Workers, Asterisk

- Kotlin Android SMS gateway for ~13 phones (STOP compliance, quiet hours, **382 tests**); traced a ~60% send-failure rate to flapping WebSockets. Mail relay as a Cloudflare Worker speaking SMTP over TLS with a hand-written DKIM signer (**10/10 on mail-tester**). PBX call-center integration built and tested (124 integration tests), awaiting vendor API keys.

Back office, affiliates, payments and lobby

TypeScript, Next.js 16, React 18, Cloudflare

- Lion Affiliates: a dependency-free auth service (scrypt, JWT with refresh rotation) and a wallet-API adapter for ~98 agents and ~12k players. Lion Pay: a payment hub with an intent state machine, append-only ledger and reconciliation (178 tests).
- Redesigned the lobby for **4,387 games** as a runtime React bundle, shelves ranked from 1.33M graded wagers; cut tile load from **0.63 s to 0.17 s** by fixing an edge-cache leak. Migrated production from New York to Amsterdam, with restore drills.

Head of Technology & Operations

Dec 2024 – Aug 2026

Momentum Incubadora de Impacto · San José, Costa Rica

Impact incubator. Partner; led a team of five (assistants, legal, creative and tech), was the sole developer on client tickets and moved technical delivery in-house.

~22 Odoo 19 instances / **41** databases / **40+** custom modules / **40 h to 5 h** per module

Multi-tenant Odoo 19 platform — atlas

Docker, nginx, NFS, PostgreSQL

- Ran ~22 containers from one custom image with 41 databases on a remote PostgreSQL server. Found scheduled jobs silently dead on **17 of 21 instances** for up to 82 days, traced it into Odoo's server code and fixed it fleet-wide. Moved 14 sites to a new domain with **no downtime**.

Custom Odoo modules — 40+ authored

Python, XML / QWeb, ORM, PostgreSQL

- AI-assisted development cut module delivery from about **40 hours to 5**; a portal helpdesk (7 models, 49 tests) went from brief to production in two days. Shipped a corporate registry (22 models, 19 routes), appointment booking with video capture, commission pricing, payment auto-reconciliation, WhatsApp Cloud API, clinic patient records, rentals and hotel booking.

AI in the ERP, legal data and fintech

Claude API, ChromaDB, Ollama, Solidity, Hardhat

- Atlas: a Claude tool-calling agent in Odoo's chat over live ERP data, with ~24 REST endpoints for the mobile app. LegalAI: a resumable scraper that collected **80,907 Costa Rican legal texts** (63,753 in force), with RAG question answering on top.
- Semilla fintech onboarding: a 5-step KYC / KYB portal with beneficial-owner trees, invitation-only onboarding and a Telegram gatekeeper bot; SEMPayment and SEMEscrow smart contracts on Avalanche mainnet (26 + 14 Hardhat tests).

Freelance Odoo Developer & Consultant

2019 – Present

10 clients across multiple industries · Remote · implementations, modules, integrations, migrations

- Jewelry e-commerce client on Odoo 19: loaded a 5-brand catalog over XML-RPC in memory-checked batches on a 2 GB server (**7,451 products**), then used the Claude batch API to write names and descriptions for 7,387 products, verified in production.
- Incident response for the same client: contained a crypto-miner and rootkit in the PostgreSQL container in about **2 minutes**, removed it in 8 with no data loss, then firewalled Docker, bound ports to localhost and rotated secrets.

Chief Technology Officer

Apr 2020 – Jul 2023

Puerto Rico's Finest · wellness startup (CBD products), team of five

- On the executive team. No systems existed: built the platform on Odoo and Shopify (storefront, inventory, manufacturing, fulfillment, automated production tracking); it processed **50,000+ orders** and supported about $250,000 a year in revenue.

VENTURES, FOUNDED OR CO-FOUNDED · RUN DAY TO DAY BY THEIR OWN TEAMS

Founder & Engineer — Lapa Concierge

· Nosara · code on github.com/victoreh24 — Sep 2026 – Present

- Tourism concierge and rentals product built end to end: an Odoo 19 backend (5 modules, **101 tests**) with a versioned REST API and Google / Apple sign-in, an Expo app and a bilingual Next.js 16 site. Row-locked bookings proven by a concurrent test, CI/CD that rehearses restore and rollback, and a 203-check security audit with no critical or high findings.

Founder — Ottoya.cr

· Downtown San José · closed Aug 2026 — Dec 2023 – Aug 2026

- Convenience store with 4 employees, built end to end on Odoo, plus an Expo commerce app (25 screens, TypeScript) with card checkout, Lightning invoices and delivery. Built in **one day**: native e-signature for Odoo Community (SHA-256 document hash, append-only audit log) with KYC / KYB and an investment-contract workflow.

Co-Founder, Systems & Marketing — La Caliente · iPan.cr

· restaurant and bakery, San José — 2024 – Present

- Point of sale, inventory and web for two family businesses: a re-runnable Odoo 17 to 19 migration script (4 POS registers, **814 loyalty cards**), Apple and Google Wallet loyalty passes with live updates, the lacaliente.co.cr site (Astro, React) and iPan's Odoo online shop.

Co-Founder & General Manager — Hotel Alma de Luna

· Orosi, Cartago · sold Dec 2024 — Dec 2022 – Dec 2024

- Co-founded a **10-room** boutique hotel with 7 staff and took it from pre-opening to a completed sale: **$150,000 invested, sold for $210,000** in 24 months, with full P&L responsibility.

EARLIER CAREER: OPERATIONS AND MARKETING

2018 – 2020	**General Manager, Costa Rica Yoga Spa** · Nosara · 14–18 staff, P&L · occupancy raised from 35% to 75% in 24 months
2016 – 2018	**Head of Marketing, Total Software Solutions** · Heredia · team of six · online casino campaigns up to $1.2M in six months
2015 – 2016	**Web Developer, Mega Speed Corp.** · Canada, remote · two company websites and a private cloud server
2014 – 2015	**Customer Service Representative, Amazon** · San José · 90–100% attainment against quality metrics

SKILLS

LANGUAGES	**TypeScript / JavaScript (Node.js 22)**, **Python**, SQL, Kotlin, PHP, Solidity, Bash, HTML / CSS, XML / QWeb
BACKEND, DATA, INFRA	**Node.js (Express)**, REST APIs, webhooks, WebSockets, SSE, auth (JWT, scrypt, TOTP); **PostgreSQL**, SQLite, MySQL; **Docker**, **CI/CD (GitHub Actions)**, nginx, systemd, DigitalOcean, Cloudflare Workers; zero-downtime deploys, backups; AWS, GCP, Azure (occasional)
FRONTEND AND MOBILE	**React 18/19**, **Next.js 14/16**, Vite, Astro, Tailwind CSS; **React Native / Expo**; Kotlin Android; Electron
ODOO / ERP	**7 years, versions 13 to 19** (Community), functional and technical: Sales, Inventory, Accounting, Manufacturing, CRM, POS, Website; 40+ modules, portal, QWeb, payment providers, migrations
AI AND TESTING	**LLM APIs** (Claude, OpenAI, Gemini, xAI Grok), **tool-calling agents**, **RAG** (ChromaDB), voice agents (Retell AI, LiveKit), Claude Code multi-agent workflows; **unit, integration and regression testing**, release gates, load tests
INTEGRATIONS AND SECURITY	Telnyx, SIP / Asterisk, SMS gateways, WhatsApp, Telegram, email deliverability; TiloPay, BTCPay, Apple / Google Wallet, Solidity; RBAC, access-control audits, KYC / KYB, TCPA consent ledgers, incident response
BUSINESS AND CREATIVE	P&L ownership, staffing (up to 18 people), vendor evaluation, Jira, campaign operations, A/B testing, content pipelines in code
EDUCATION	**Bachelor's in Applied Statistics**, UCR · Técnico Medio, Diseño Publicitario · English, Spanish: native
